

Audacity – Frequently Asked Questions.

Question 1:

How do I run a virus check on software or files I have downloaded from the Internet?

- Locate the software or files that have been downloaded onto your computer.
- Right click with the mouse on the software / files. A little menu appears, with various options such as "Rename", "Copy", "Scan with virus checker". Select "**Scan with virus checker**".
- Note: The virus checker may be Bit Defender or AVG etc.
- The virus scan will take place. When completed, close the dialog box.

Question 2:
