Introduction

Welcome to this e-learning course on 'Photography - Creating an Audiovisual Slide Show'.

This course will provide the necessary skills required to create an audiovisual slide show. This module called 'Photography - Creating an Audiovisual Slide Show' consists of four units:

- Project Administration
- Photography Preparation
- Audacity
- Pictures To Exe

Course Objectives

Students who complete this course will be able to:

- Create and manage folders and files using Windows Explorer.
- Adjust and enhance images using Photoshop CS3.
- Download and use Audacity to edit sound files or record sound files.
- Download Pictures To Exe and create an audiovisual slide show presentation.

How to start:

Select from one of the four units to start a lessons, by clicking on the unit buttons on the left-hand side of the browser window.

- If you are a beginner, it is recommended you undertake all the lessons in each unit.
- For the more advanced users you can optionally 'jump around' to any unit.
- You can use the Forum to interact with other students undertaking this course.
- You can also leave and return to the course at your convenience.
- You can view any page by selecting the 'Site map' button located on the upper-right of your browser window.

Note:

All of the required materials are included in this online course - practice exercises, sound files and images.

Performance Measurement:

There are a number of practice exercises throughout the course that ensure the objectives are met. These exercises help you to recall what you have learned over the course of the lesson and in so doing help you to proceed.
