

Photography Preparation Review Quiz.

Question 1:

To crop an image to a specific size what kind of measurements can you enter in the options bar width and height text boxes? Select the correct **four** answers.

- a) feet
- b) in
- c) px
- d) kilobytes
- e) mm
- f) pixelated
- g) centipedes
- h) cm

(b), (c), (e), and (h) are the correct answers.

Question 2:

Why is the “rule of thirds” used when cropping an image?

- a) The “rule of thirds” is used to help improve the composition of your image. The image is divided into a 3x3 imaginary grid.
- b) The “rule of thirds” is used to ensure the image is centered vertically and horizontally.
- c) The “rule of thirds” ensures your image is in focus in every area of the image.

a) Is the correct answer.

Question 3:

What tool do you use to straighten a crooked image?

- a) Slice tool
- b) Line tool
- c) Measure tool
- d) Ruler tool

(d) Is the correct answer.

Question 4:

What is the level dialog box used for?

- a) The levels controls allow you to adjust the highlights midtones and shadows of an image that is over or under exposed.
- b) The levels control dialog box is used to control the brightness and contrast of an image.
- c) The levels control dialog box is used to de-saturate an image.

(a) Is the correct answer.

Question 5:

What are the **two** methods used to correct an over or underexposed photograph?

- a) The Match Colour dialog box
- b) The Exposure dialog box
- c) The Hue Saturation dialog box
- d) The Channel Mixer dialog box
- e) The Levels dialog box

(b) and (e) are the correct answers.

Question 6:

In Photoshop CS3 what is the Toolbox?

- a) The toolbox contains menus for performing tasks
- b) The toolbox provides options for using a tool
- c) The toolbox is the tall, narrow palette that sits at the left edge of the workspace. The toolbox contains many of the tools needed to edit images.

(c) Is the correct answer.
