

1. How to download Pictures To Exe from the Internet.

At the end of this lesson you will be able to execute the procedure for downloading Pictures To Exe from the Internet by launching the web browser and typing the correct URL address into the URL address bar. The Pictures To Exe homepage will open up and you can click the download button to download the program onto your PC.

Step One:

Type <http://www.wnsoft.com> into the **address bar** and hit the return key.

On the main page there is a button to “Download Trial” and another button to “Buy Now”. The software package is the same either way but the trial version has a maximum limit of ten images. Once you purchase the program you will receive a registration key, which will remove all restrictions from the program.

Step 2

Click the **Download Trial** button and save to the folder called **“Downloaded_software”**.

Note: Saving the file to a folder on your computer allows you to scan the downloaded installation file for viruses before you install the program.

In the next lesson we will install Picture To Exe.
