

13. Saving your project and creating and exe file.

At the end of this lesson you will be able to execute the procedure for saving your project in .pte format by selecting the 'File > Save As' option and create an EXE file by clicking the Create button and selecting the 'Executable file for PC' option.

Step One:

Select **File > Save As**.

Give it an appropriate name e.g. Project1.ppt.

Save in your folder called **PTE > PTEproject1**.

Step Two:

To create the EXE file, go to the Controls Button panel and select the **Create** button. A list of options are displayed, select "**Executable File for PC**".

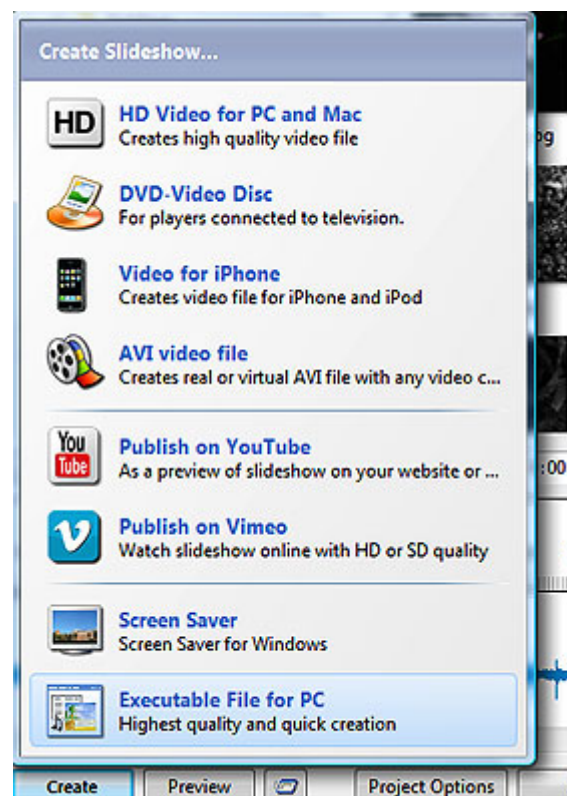

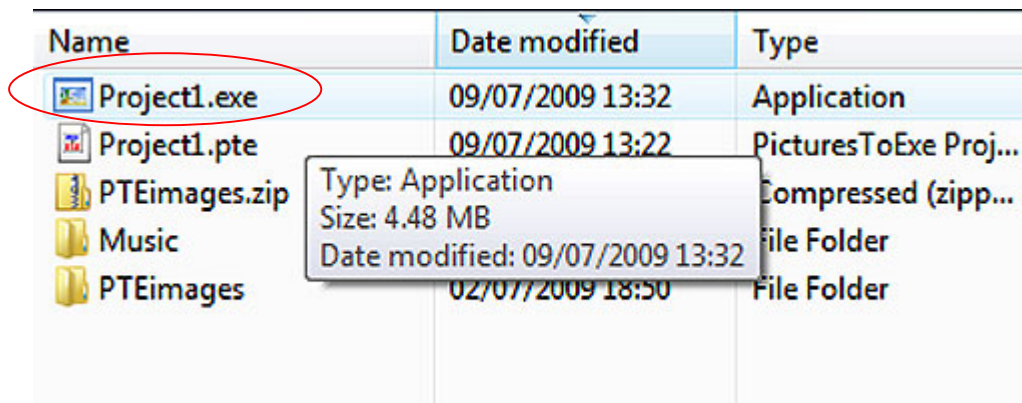

Figure 13.1 Create button options.

Step Two:

Select a location and a suitable name. Save it into your folder called PTEproject1 with the name Project1.exe.

Step Three:

Locate your file in the PTEproject1 folder and double click on it to Preview it.

Well done, you have now created your first slide show using Pictures To Exe.

I hope you have enjoyed this course.
