

6. How to insert the memory card from your camera into the memory card reader on your computer.

At the end of this lesson you will be able to execute the procedure for removing the memory card from your camera and inserting it into the card reader on the computer to allow the transfer of images.

Once it is inserted, the AutoPlay dialog box will appear on screen and you will be able to transfer the images from the camera to the computer.

Step One:

Ensure the camera is turned off.

Step Two:

Remove the memory card from the camera.

Figure 6.1 Memory card in camera.

Step Three:

Insert the memory card into the computers memory card reader. Ensure it is inserted correctly; do not force the memory card into the computers card reader slot.

Figure 6.2 Memory card inserted into memory card reader in computer.

Step Three:

Windows will detect the new device and the AutoPlay dialog box with options will appear.

Advantages of using the memory card reader:

The main advantage of using the memory card reader rather than the USB cable is that the images are sometimes transferred faster using this method and you will not use up your cameras batteries.

In the next lesson we will be transferring pictures from your digital camera using the AutoPlay dialog box.
